

KAN GROW PLANT PREPARATION

Plant-Powered Crop Yield Enhancer

Allows for a rapid release of nutrients trapped in a plant's root zone through an increase in the cation exchange capacity of any soil type. Compatible with many liquid fungicides and micronutrients. Optimal for increasing plant health, crop growth, and plant resistance.

Ingredients

The proprietary ingredients of this product are protected by United States patents. This product is made from renewable plant resources and is completely biodegradable. Kan Grow products meet the standards for being designated a Green Product.

See MSDS for more information or scan the QR code below.

Health hazards

Kan Grow does not contain hazardous or carcinogenic ingredients currently defined by OSHA regulations. Safety glasses or goggles and latex gloves or neoprene gloves are recommended.

Keep out of reach of children. Always store in a secure area.

Features

- Releases nutrients without side effects
- Deters insects
- Reduces insecticide, herbicide and fungicide needs
- Compatible with all liquid fungicides, fertilizers, pesticides and micronutrients
- Improves crop yield
- Safe for the environment and people
- Improves soil health
- Scientifically engineered technology
- Achieves emission reductions
